Minneapolis, MN 55415

Re: Andrew Layton, deceased

Dear Mr. Behrenbrinker:

I have reviewed the autopsy report, autopsy photographs and X-ray, microscopic slides, the Ramsey County Medical Examiner's file, scene and Blue Earth County Jail sally port videos, a timeline, police reports, Gold Cross Ambulance Service reports, the Gold Cross paramedics depositions, Mankato Hospital records, prior health records, and deposition testimonies of Dr. Butch Huston and City of Mankato police officers, that you sent to me relative to the death of Andrew Layton. I also examined an exemplar of the spit mask/hood that you provided.

Mr. Layton, 26 years old, was found sleeping on the floor inside the front entrance of an all-night Hy-Vee grocery store about 4:00 a.m. on January 1, 2013. He was wearing a heavy winter coat. He struggled with responding police officers, was

PLT7172

EX. A

Layton/Baden
19 August 2016
Page -2-

drive stunned with a Taser and hogtied with his hands cuffed behind his back connected to ankle restraints by a hobble strap with pressure to his back. Such back pressure can prevent the diaphragms from moving which is essential for the lungs to be able to inhale and exhale. A spit mask was put over his head with the fabric covering his mouth and nostrils which makes inhaling air difficult. The police called for an ambulance at 4:58 a.m. He was further restrained with Velcro bands and seat belts when he was placed face down in prolonged four-point restraint on the responding Gold Cross ambulance stretcher. According to the EMT in the ambulance, he was monitored for breathing and pulse by palpating his back and wrist through the heavy coat; his face was pushed down into a pillow when he lifted it. He suddenly stopped struggling while the ambulance was being driven to the Blue Earth Jail. They arrived at the jail at 5:21 a.m.

He was not breathing and had no pulse when he was removed from the ambulance in the jail's sally port. A second ambulance was then called at 5:27 a.m. A sinus cardiac rhythm did return during CPR. On admission to the Mankato Hospital at 5:52 a.m., almost an hour after the initial ambulance call, he had bruises on his head and face and was unresponsive. He was immediately placed on a hypothermia protocol which is designed to diminish brain damage caused by a lack of oxygen to the brain, without success.

A full medical workup included EKGs, an echocardiogram, cardiac enzyme tests (CK, CK-MB, troponin), and X-rays that showed his heart was normal – that he had not had a heart attack or any other type of heart malfunction. He did have an elevated blood alcohol concentration of 0.143% and amphetamine was found in his urine but not in his blood. Drugs in the urine have no effect on the body. No illicit drug was found in his blood. He remained comatose and was diagnosed as having incurred irreversible hypoxic brain damage due to lack of oxygen. After he was hospitalized he developed bronchopneumonia. He was pronounced dead on January 5th, four days after hospitalization.

The autopsy showed multiple abrasions and bruises to his face, lip, chin and the left side of his neck. The autopsy report notes “hemorrhage involving the fascia of the left omohyoid and sternohyoid muscles – the strap muscles of the neck – overlying the left lobe of the thyroid.” Fresh hemorrhage was also present along the entire left greater horn of the hyoid bone which was confirmed by microscopic examination and was evidence of severe neck trauma. An X-ray shows a fresh fracture and separation of the left greater horn of the hyoid bone from the body of the hyoid bone with prominent surrounding hemorrhage, evidence of a fracture while being restrained. The hyoid bone is a small U-shaped bone just above the thyroid cartilage – the Adam’s apple – in the neck. Severe compression of the neck

Page -4-

by hand, knee or foot is necessary to fracture it, which compression can cause death by preventing oxygen from reaching the brain.

The Coroner certified the cause and manner of Mr. Layton's death as "Arteriosclerotic Heart Disease. Natural." However, although Mr. Layton had significant narrowing of his coronary arteries by arteriosclerosis, there was no autopsy, microscopic, clinical or medical evidence that he had had a heart attack or that his cardiac status caused or contributed to his death. The thorough medical evaluation at Mankato Hospital ruled out arteriosclerotic heart disease as a possible cause of death.

In fact, Dr. Huston, in his deposition, disagreed with the cause of death that the Coroner listed on the Death Certificate. Dr. Huston testified that, Mr. Layton did not die of heart disease. In his opinion the cause and manner of Mr. Layton's death was "Pneumonia probably due to excited delirium. Accident." However, clearly, the pneumonia developed after he arrived at the hospital. Excited delirium is a very controversial diagnosis, not accepted as a proper cause of death by the American Psychiatric Association – delirium is a psychiatric disorder – or by the World Health Organization. Human rights groups claim it is invoked only when deaths occur during restraints by police to absolve police officers of responsibility. The diagnostic criteria for excited delirium require the individual to be very agitated, to

PLT7175

EX. A

Layton/Baden
19 August 2016
Page -5-

be acting bizarrely and to be delirious which prompts the police to be called; to be under the influence of a drug most commonly cocaine; and to have a very high temperature of more than 104°F. None of these criteria apply to Mr. Layton who was found sleeping quietly on the store floor after drinking alcohol New Year's evening into the early morning; no drugs were present in his blood other than alcohol; and his temperature was normal at Mankato Hospital. He was uncooperative but not delirious. If excited delirium is suspected, police and ambulance responders should bring the individual to a hospital for immediate evaluation because excited delirium can be rapidly fatal.

It is my opinion that the prolonged prone restraint with pressure on his back, the neck compression with fracture of the hyoid bone, and the placing of a spit mask over his face, all interfered with Mr. Layton's ability to breathe properly and caused a respiratory arrest that resulted in hypoxic brain injury and then a cardiac arrest. This type of death has been referred to as traumatic asphyxia, mechanical asphyxia, positional asphyxia or suffocation.

It is my opinion, to a reasonable degree of medical certainty, based on my education, training and experience and on the above materials that I have reviewed, that Mr. Layton died because he could not breathe; that the cause of his death was "Traumatic asphyxia while being restrained;" that the manner of death was

PLT7176

EX. A

Layton/Baden
19 August 2016
Page -6-

"Homicide" because his death was at the hands of another; and that he would not have died when he did if he had been brought promptly to the hospital. Driving to the jail first resulted in a more than 30 minute delay before he arrived at the hospital and took away from Mr. Layton any possibility of recovery from this hypoxic episode; if he had been driven directly to the hospital, he would not have died when he did.

Very truly yours,

A handwritten signature in black ink that reads "Michael Baden". The signature is written in a cursive, flowing style.

Michael M. Baden, M.D.
Former Chief Medical Examiner,
New York City
Former Chief Forensic Pathologist,
New York State Police

CURRICULUM VITAE

EDUCATION

- The City College of New York (1955) B.S. Degree
- New York University School of Medicine (1959) M.D. Degree

POST-GRADUATE TRAINING

1959-1960	Intern, First (Columbia) Medical Division, Bellevue Hospital
1960-1961	Resident, First (Columbia) Medical Division, Bellevue Hospital
1961-1963	Resident, Pathology, Bellevue Hospital
1963-1964	Chief Resident, Pathology, Bellevue Hospital

LICENSURE

- New York State Medical License (1960)
- Diplomate, National Board of Medical Examiner's (1960)
- Diplomate, American Board of Pathology:
 - Anatomic Pathology (1965)
 - Clinical Pathology (1966)
 - Forensic Pathology (1966)

PROFESSIONAL POSITIONS

1985-2011	Director, Medicolegal Investigations Unit, New York State Police
1961-1985	Office of Chief Medical Examiner, New York City; Chief Medical Examiner (1978-1979)
1981-1983	Deputy Chief Medical Examiner, Suffolk County, New York; Director of Laboratories, Suffolk County, New York

TEACHING APPOINTMENTS

1961-1989	New York University School of Medicine, Associate Professor, Forensic Medicine
1975-2001	Visiting Professor of Pathology, Albert Einstein School of Medicine
1975-1988	Adjunct Professor of Law, New York Law School
1975-1978	Lecturer in Pathology, College of Physicians and Surgeons of Columbia University
1986, 1989	Visiting Professor, John Jay College of Criminal Justice
1965-1978	Assist Visiting Pathologist, Bellevue Hospital, New York
2002	Adjunct Lecturer, The Cyril H. Wecht Institute of Forensic Science and Law, Duquesne University School of Law
2002	Distinguished Professor/Adjunct Lecturer, Henry C. Lee Institute, University of New Haven (Connecticut)

GOVERNMENTAL APPOINTMENTS

1977-1979	Chairman, Forensic Pathology Panel, United States Congress, Select Committee on Assassinations, Investigations into the deaths of President John F. Kennedy and Dr. Martin Luther King
1973-Present	Member, New York State Correction Medical Review Board
2015-Present	Member, New York State Justice Center for the Protection of People with Special Needs
1976-2014	Member, New York State Mental Hygiene Medical Review Board (<i>renamed</i> Justice Center for the Protection of People with Special Needs in 2015)
1983-1986	Member, National Crime Information Center, Committee on Missing Children, United States Department of Justice (F.B.I.)
1971-1975	Special Forensic Pathology Consultant, New York State Organized Crime Task Force (investigation of deaths at Attica Prison)
1974-2006	Director and/or Moderator, Annual Northeastern Seminar in Forensic Medicine, Colby College, Maine
1973-1987	Lecturer, Drug Enforcement Administration, Drug Law Enforcement Training School, United States Department of Justice

PROFESSIONAL ORGANIZATIONS

1966-Present	American Academy of Forensic Sciences; Fellow Vice President and Program Chairman (1982-1983)
1965-Present	The Society of Medical Jurisprudence; Fellow, President (1981-1985)
1966-Present	College of American Pathologist; Fellow, Chairman, Toxicology Subcommittee (1972-1974)
1971-1975	College of American Pathologists Foundation; Forensic Pathology Seminar Faculty
1973-1976	American Board of Pathology; Forensic Pathology Board Test Committee (1973-1976)
1966-1986	American Society of Clinical Pathologist; Fellow Member, Drug Abuse Task Force (1973-1977)
1965-1978	New York State Medical Society; Chairman, Section of Medicolegal and Workers' Compensation Matters (1972)
1965-Present	Medical Society of the County of New York
1969-1978	National Association of Medical Examiner's
1965-Present	American Medical Association

HONORS

- The City College of New York: Senior Class President; Editor-in-Chief of The Campus (newspaper); Phi Beta Kappa
- Honor Legion, New York City Police Department, 1969
- College of American Pathologists, Certificate of Appreciation (Chairman, Toxicology Resource Committee, 1972-1975)
- American Academy of Forensic Sciences, Award of Merit, 1974 and 1983
- Drug Enforcement Administration, United States Department of Justice, Certificate of Appreciation, 1982
- New Jersey Narcotic Enforcement Officers Association, Certificate of Appreciation, 1977
- Fire Department of the City of New York, Certificate of Appreciation, 1978

- New York State Bar Association, Certificate of Appreciation, 1980
- New York City Health and Hospitals Corporation, Certificate of Appreciation for participation in development of emergency facilities for Emergency Medical Services for the City of New York, 1980
- New York University, Great Teacher, 1980
- First Fellow in Forensic Science of the University of New Haven, Henry C. Lee Institute, (Connecticut), 2002
